-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Election/Restrictions

1. The Art Unit location of your application in the USPTO has changed. To aid in correlating any papers for this application, all further correspondence regarding this application should be directed to Art Unit 1649.
2. The Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 32-37 drawn to isolated recombinant animal host cells and methods of producing a recombinant polypeptide comprising the amino acid sequence of SEQ ID NO:59, classified in class 435 and subclasses 69.1 and 325 for example.
 - II. Claims 32-37 drawn to isolated recombinant animal host cells and methods of producing a recombinant polypeptide comprising the amino acid sequence of SEQ ID NO:60, classified in class 435 and subclasses 69.1 and 325 for example.
 - III. Claims 32-37 drawn to isolated recombinant animal host cells and methods of producing a recombinant polypeptide comprising the amino acid sequence of SEQ ID NO:61, classified in class 435 and subclasses 69.1 and 325 for example.
3. The inventions are distinct, each from the other because of the following reasons: Although there are no provisions under the section for "Related Inventions" in M.P.E.P. 806.05 for "inventive groups that are directed to different products; restriction is

Art Unit: 1649

deemed to be proper because these products appear to constitute patentably distinct inventions for the following reasons:

Groups I-III are directed to products and methods that are distinct both physically and structurally, and are therefore patentably distinct, and are not required one for the other. The current USPTO policy is to search a single nucleotide/amino acid sequence per Application. The claims must be amended to reflect the invention, i.e. SEQ ID NO that is elected.

4. Because these inventions are distinct for the reasons given above, and because the search and examination of these groups are different because they involve separate searches in both the patent and non-patent literature, restriction for examination purposes as indicated is proper because the search and examination of these groups is different and would pose an undue burden to the examiner.

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.1741).

6. Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Technical Center 1600 general number which is (571) 272-1600.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Stephen Gucker whose telephone number is (571) 272-
